## AUDIOVISUAL ENGINEERING AT ITS BEST!

### Studiotech Belgium Mobile NLE System

The Mobile NLE System designed, produced and marketed by Studiotech Belgium includes the Avid Media Composer solution, a dedicated computing platform (HP 17 inch Zbook or similar), a data acquisition card, a monitoring screen, a video patch for I/O connections, a microphone for voiceovers, all together in one convenient 'grab and go' box. The Mobile NLE Studio offers all the power of a mobile editing system installed in a convenient and compact box. Easy to set up and use, it is readily portable to ensure coverage of any event at express speed by providing quality results and powerful graphics.

The Avid Media Composer editing solution is the preferred choice of professional editors in film and television. Fully integrated in a portable version, Media Composer lets you manage large volumes of media. It is compatible with most formats used in the video world.

AUDIOVISUAL ENGINEERING SA-NV

- **Studiotech Belgium design and production**
- **Compact modular assembly readily portable**
- **Complies with international airline regulations**
- **Quickly operational without internal connections**
- **I/O via audio/video patch at the back**
- **Versions available with Studiotech interface or Avid Mojo DX**
- **All-in-One mobile solution immediately operational**

The lightweight system meets international standards for air transport, which will appeal to any film crew used to frequent travel. Its modular design allows simple and speedy set-up, the box is lighter and cheaper to transport than traditional tower or rack equipment.

With its new features, Media Composer lets you play back clips directly from their source and explore options for composition. So you can quickly compare different versions of a sequence by right clicking your video or audio clip to transfer it, speed-up editing thanks to recent improvements in timeline, easily display in multicam and fully control the audio and voiceover.
